Piano Stools

MANUFACTURED BY THE

ARCHER MANUFACTURING COMPANY,

Nos. 5, 7 & 9 North Water Street,

ROCHESTER, N. Y.

BRANCH OFFICE AND SALESROOM:

227 Canal Street, NEW YORK.

To the Trade.

We call your special attention to the entirely new and original designs of Piano Stools presented in this Catalogue. All of these designs are either Patented or Patents applied for, and we caution all from manufacturing or dealing in any Stool infringing upon the same.

Respectfully yours,

ARCHER MANUFACTURING CO.

ROCHESTER, N. Y.

Archer's Adjustable Piano Stool No. 90.

(Patented.)

The above illustration shows the handsomest and most convenient Square Seat Piano Stool ever produced. It is raised or lowered by means of a screw and worm, upon a shaft running crossways through the seat rails, and is operated by turning the hand knobs on either end of said shaft. The movement is rapid and easy to operate.

As will be seen by the illustration, the upholstered seat is made in halves, which work upon a slide, so that they can be opened out or separated a little over ten inches, thus making a perfect and complete Duet Stool.

This Stool is very strong and firm, and for convenience and utility has not its equal.

When desired, we can furnish an Extra Seat to fit between the two halves when opened out.

 For Prices see next page.

PIANO STOOL No. 90.

(Patented.)

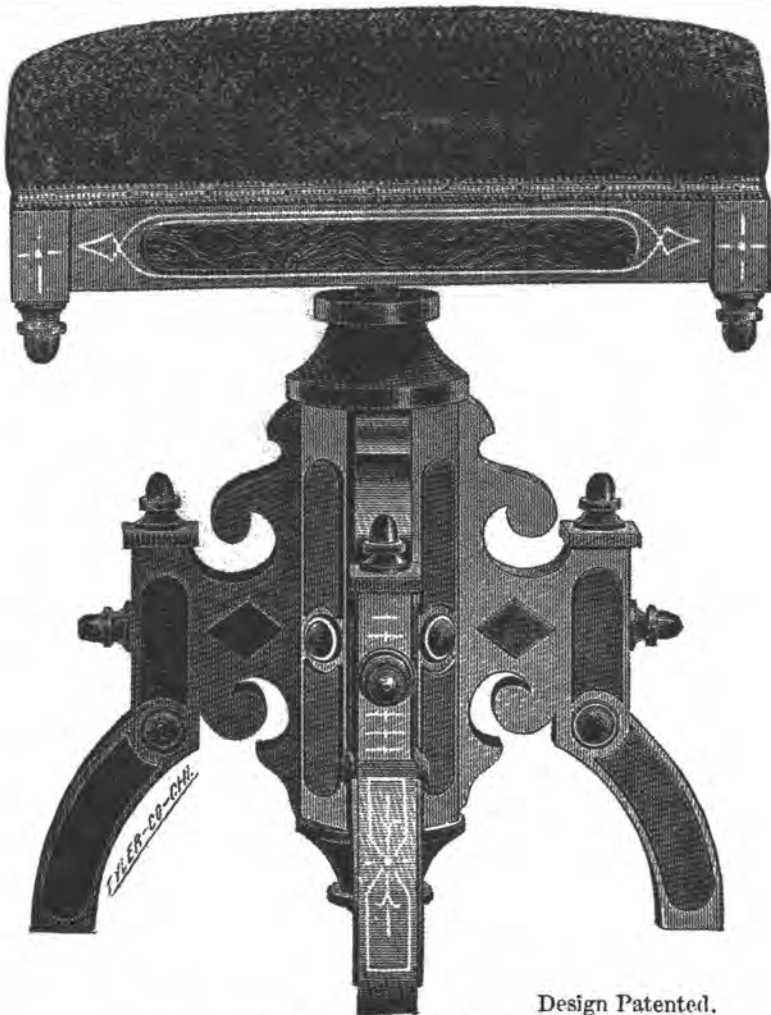

The above illustration shows this Stool with seats separated to accommodate two persons.

PATENT ADJUSTABLE BACK

Piano and Parlor Organ Chairs.

THE practice of sitting at a piano or organ practising for hours together, without a support for the back, is tiresome in the extreme, as every player well knows; and, giving way to the tired feeling, very many, especially young persons, attempt to rest or relieve themselves by assuming a position which is not only ungraceful, but unnatural and unhealthy, and are often permanently injured thereby. To rest the back, it is not always necessary to incline the body to the rear. The body may lean forward, but if there is a something against which the back may be pressed, it affords a sense of support, a feeling of ease which can be obtained in no other way, and really forms a true rest. The ordinary piano-stool is not a comfortable seat under any circumstances, yet no material improvement was made upon the original design until this Adjustable Back Piano Chair was invented. The back of this chair is made to incline in such a manner as to support the back of the sitter while leaning forward in the ordinary position for playing, and by a simple arrangement, which gives it a backward, and at the same time a downward, movement, follows his motions and supports him in any position, without the slightest interference with the freedom of his movements. Although this Chair has been before the public but a short time, it has already attracted marked attention, and has gained the highest approval of all who have tested it. We are confident that it will fully meet the needs of thousands who have long been hoping and anxiously looking for some such improvement, and that teachers, scholars, and finished amateur and professional players will alike welcome it. These Chairs are equally applicable for the Sewing Machine.

 To the Music Trade. 

It is with pleasure that we notify our patrons that we have made arrangements to hereafter manufacture the *Patent Adjustable Back Piano and Organ Chair*, formerly made and sold by Albert Best & Co., of Buffalo, N. Y. We will only say that we shall make this Chair in a superior manner, and only as a first-class article in every respect.

Best Quality Green, Crimson or Maroon Plain Plush	12 00

Circular Issued April 15th, 1886.

IN presenting our new Price List to the trade, we desire to thank our customers for their past liberal patronage, and to assure them that we shall try to deserve a continuance of their trade by giving them the best article that can be afforded for the money, and by dealing with them in a spirit of fairness and liberality. Our prices will always be as low as those of any other manufacturer, and at the same time we shall try to turn out a better quality of work.

We would call attention to our new designs, especially to our Numbers 48, 54, 58 and 64 and to the manner of constructing the feet. The turned spindles which form the design of the feet pass through the lower portion of the foot and the end of spindle rests upon the floor, giving the foot strength as well as beauty. These Stools are much stronger than if made in one piece. We have applied for letters patent upon the designs of these Stools as well as on the new mode of construction of the feet and herewith caution all against buying, using or manufacturing Stools of similar design and construction, as we shall protect our patents to the full extent of the law. The new designs we offer to the trade are Numbers 38, 44, 48, 54, 58, 60, 64, 68 and 80. They are all handsome designs and entirely new and original.

We would call especial attention to our design No. 88, which is a very handsome Stool, and the most solid and substantial Stool in the market, being made of nice grained walnut, with polished French walnut panels and engraved lines, gilded. This Stool has four legs or feet, and the pillar also rests on the floor. The seat is framed with French walnut panels and is in size 14x18 inches. No. 84 is the same in design as No. 88, but is made of maple, nicely grained in imitation of rosewood. Our styles of Piano Chairs, Nos. 1, 2 and 3, will be found very desirable to those who need a support for the back. Owing to recent improvements in our machinery, we are now able to manufacture these Chairs at less cost than formerly and have reduced prices accordingly.

By examining our circular, it will be seen that we give a larger assortment of Piano Stools, etc., in design and quality, than any other manufacturer, thus affording the dealer the advantage of purchasing his complete stock in this line at one place and consequently at more advantageous rates than if purchased of several different parties.

All our Stools are well finished and are made strong and durable. Our finer grades of Stools, etc., cannot be excelled in material, workmanship, and finish. We use nothing but the Pawtucket Hair Cloth, and a good quality of Reps and Figured Plushes.

As our competitors are using a cheaper grade of mohair Plushes, we have decided, as will be seen, to quote prices on quality No. 2 as well as No. 1. Our No. 2 mohair Plush is equal in quality to that used by other Stool manufacturers.

Soliciting a portion of your patronage and guaranteeing satisfaction, we ask you to write for Discounts and Terms.

Yours respectfully,

ARCHER MANUFACTURING CO.
